 A2 - B1

Contact details are missing for privacy reasons. If you are interested in my profile, please use the email address available on my website or on a CV that I subsequently sent you.

Mindful of data security, I aim to improve my knowledge by obtaining a degree in cybersecurity engineering, with the goal of safeguarding information systems and broadening my horizons globally.

Education

Diplôme d'ingénieur en informatique, spécialité cybersécurité

September 2026 - July 2029

Similar to : Master's Degree in Engineering - Computer science (Cybersecurity) - Apprenticeship

BTS Services Informatiques aux Organisations, option Solutions d'Infrastructures, Systèmes et Réseaux

October 2024 - June 2026

Similar to : Two-year technical degree in IT (Network & Systems)

Work experience

Euro P3C, subsidiary of Crédit Mutuel (Banking Group)

Windows 11 Migration project

IT-support internship - Total of 10 weeks - 2025

Testing phase

Modified deployment and integration scripts: PowerShell

- Software uninstallation and registry key removal
- Log redirection and timestamp implementation
- Unit testing and validation

Deployment phase

Performed integration testing

- Active Directory connectivity, WSUS functionality, network cabling

Updated IT asset inventory

- Revised network diagrams (MS Visio)
- Added and removed workstations from physical and network inventories (internal management tools)

Finalisation

Formalized new deployment and decommissioning procedures:

- Updated technical documentation
- Transferred and documented scripts for the secondary production site

Skills

Certificates

- PIX
- MOOC GDPR
- Training certificate 11.2.6.2 ZSAR (airport security)

Seasonal employment
